Barcelona 2-3 Nov. 2010
The rail freight Market in Spain: Today’s situation

- The part of rail freight within the whole transport modes is the less than 10 years ago. In 2009 only 5.2% of Interland transport from ports (8.8 Mt) has been transported through rail.

- In the meantime Overseas & Overland transport had increase tremendously.

- Why? Competitiveness & Quality…

Barcelona 2-3 Nov. 2010
But still a market with growing perspectives

- France being at the cornerstone of freight exchanges between Iberian Peninsula and Europe
- The weight of rail freight is marginal Vs road and sea
- NAVILAND Cargo is already a key player on Combined Transport in France
- Already a recognized operator from Spain (Barcelyon)
Barcelona 2-3 Nov. 2010

Barcelyon service:
rail container service from Port of Barcelona to Lyon

- Service operated Renfe & Naviland Cargo & Port of Barcelona
- Origin-Destiny: Spain (container terminals at the Port of Barcelona) – France (rail terminal at Vénissieux, Lyon)
- Frequency: 2 trains/week in both directions (Tuesday & Thursday)
- Multi customers train
- Maritime containers (40’, 20’, tanks, 45’ and other types) and also continental containers
- Toulouse: in preparation (beginning 2011)
From January 2011, trains up to 750 meters will connect the Port of Barcelona and France using the new UIC line avoiding transhipment of cargo at the border.
Our mission: QUALITY        Our aim: YOUR CONFIDENCE        Our garanty: NEUTRALITY

Barcelona 2-3 Nov. 2010

Rail services through the Port of Barcelona

Number of weekly rail services (one way)

From port terminals TCB / TERCAT
* Shortly in service
** Non regular block train service

From the intermodal adjacent terminal of Morrot
International services

Transport corridors:
- Ebro
- Transversal ibérico
- South of France
- European

Short Sea Shipping Services
Our Market approach

- Selective Market Development
  - On our core segments
    - Port offer/sea containers
  - New territories
    - Maghreb, Portugal, Italy
  - With new or developed capabilities
    - Managing our own traction

- Methods
  - Preliminary : Using hubs as gateways
    - Barcelona
  - Internal Development : Learning and competence development
    - Support from SNCF Group
  - Strategic Alliances/Joint Development : Complementary competences, learning from partners
  - Selectives external growth
Our projects (2011-2012)

- Developing our strategic Alliance with Port of Barcelona
  - Launch of 3rd train between Barcelona and Lyon (possibly dedicated to a single customer)
  - Considering a new connection between Barcelona and Toulouse

- Building a partnership with a road haulier in Spain
  - For traction solution purpose (pre and post deliveries)
  - To promote and develop domestic traffics

- Investment consideration in wagons

- Being an active partner of the terminal network in Spain (Port and Continental)

- Our offer will be pending to changes linked to UIC rail connection between Spain and France (Length of trains, direct connection to Barcelona...)
